Amendments- Specification*In reply to point 2- Specification: - The abstract of the disclosure is objected to because words "comprise/comprising" should not be used in the abstract.**The applicant requests that the present abstract be removed and replaced with the amended abstract per below:*

20

Abstract of Disclosure

A method and apparatus is provided for a multiple light-source illuminating device, the design and construction of which is derived from the lighting requirements of a specific lighting application. The resulting illuminating device (16) provides illumination according to the principles of lighting practice for the optimal performance of visual tasks. Coupling with sensors (21) and logical control (20) allows illumination intensity and spectrum to be varied according to changing user needs. The illuminating device includes multiple discrete light emitting components of different spatial intensity distribution and color spectrum mounted in specific orientations such that the application oriented combined lighting effect is created. The control is provided via a differentiated power supply (19) capable of affecting the
